Stormwater Management

SERVICES INCLUDE:

Permitting

Pollution Prevention Plans

Best Management Practice Plans

Stormwater Sampling/Characterization

Mapping (GIS/ARC Info)

Monitoring, Record keeping & Reporting

Feasibility Studies

Conceptual Plans

Design Services

Construction Phase Services

Detention/Retention Basins

Expert Testimony

D&B Engineers and Architects, P.C. (D&B) provides complete stormwater management engineering services, including field surveys, studies, design, permitting and construction administration, to both municipal and industrial clients.

The firm has specialized expertise stormwater regulations and permitting requirements with regard to the recent changes in the Clean Water Act requiring State and National Pollutant Discharge Elimination System (SPDES/NPDES) coverage.

D&B's stormwater management experience addresses a broad spectrum and diversity of structures and facilities including:

- Storm Sewers and Catch Basins
 - Detention/Retention Structures
 - Recharge Basins and Outfalls
- Street Drainage
- Airport Runways
- Parking Lot Drainage
- Aircraft Deicing Operations
- Landfills
- Industrial/Manufacturing Facilities
- Solid Waste Transfer Stations

- Wastewater Treatment Plants
- Transportation Maintenance Facilities
- Composting Facilities

As former regulators and participants in the National Urban Runoff Program, and as active program managers involved in the development of the existing stormwater management program under the Clean Water Act Amendments, D&B's staff has been actively involved in the development of the United States Environmental Protection Agency stormwater program. The firm's senior staff have also made numerous presentations to professional societies and municipalities at environmental seminars and conferences.

As part of its stormwater experience, D&B also has direct and extensive experience with various permitting options, including individual, group or general permits. In addition, D&B's senior staff have been retained by the New York State Office of the Attorney General and the New York State Thruway Authority to provide expert testimony in defense of the state during a multi-million-dollar lawsuit involving stormwater discharge.

The firm also has decades of experience in the design and construction aspects of stormwater and drainage facilities. This has included roadway improvements, stream flow augmentation, storm sewer and catch basin design, construction phase services and facilities operations.
